

ChangFu® BPH33  
1,4-Bis(triethoxysilyl)benzene

**Description** ChangFu® BPH33 is a dipodal silane with two triethoxysilyl groups. In the presence of water, it can undergo hydrolysis and condensation reactions. It can also undergo addition reactions with unsaturated compounds to form chemical bonds. Its unique properties make it workable for a variety of fields, ranging from organic synthesis to environmental applications.

**Features & Benefits** Reactive dipodal silane.  
Known for its catalytic activity and bioactivity.  
Hydrolysis pattern differing from that of conventional trialkoxysilanes.

**Applications** Used as an important additive in the preparation of porous organic polymers and bridged polysilsesquioxanes with great adsorption capacity in environmental protection.  
Used in fuel cell applications to synthesize hybrid membranes showing high water absorption capacity and stable proton conductivity.

### Typical Properties

Description	1,4-Bis(triethoxysilyl)benzene
Product No.	ChangFu® BPH33
CAS No.	2615-18-1
Formula	C <sub>18</sub> H <sub>34</sub> O <sub>6</sub> Si <sub>2</sub>
Purity	min 97%
Color	Colorless
Appearance	Clear liquid

**Package** Offered in 25L pails and 200L drums.  
Custom packaging is available.

**Storage** Stored in a cool, well-ventilated place.  
Keep container tightly closed.

**Transportation** See the corresponding Safety Data Sheet.
