

ChangFu® SBA17
N-Trimethylsilylacetamide

Description	ChangFu® SBA17 is a chemical compound that mainly serves as a silylation agent and an acetylating agent in organic synthesis and biochemistry. Its hydrophobic and nucleophilic characteristics help it play an important role in various applications.
Features & Benefits	High reactivity. Effective silylation reagent. Valuable reagent and intermediate in organic synthesis.
Applications	Used as a silylation reagent and an intermediate in the synthesis of various organosilicon compounds, pharmaceuticals, and agrochemicals.

Typical Properties

Description	N-Trimethylsilylacetamide
Product No.	ChangFu® SBA17
CAS No.	13435-12-6
Formula	C ₅ H ₁₃ NO _{Si}
Purity	min 96%
Color	Colorless or light yellow
Appearance	Clear liquid

Package	Offered in 25L pails and 200L drums. Custom packaging is available.
Storage	Stored in a cool, well-ventilated place. Keep container tightly closed.
Transportation	See the corresponding Safety Data Sheet.
