

**ChangFu® SBA11TM**  
**tert-Butyldimethylchlorosilane**

<b>Description</b>	ChangFu® SBA11TM is a solid silane compound consisting of one tert-butyl group, two methyl groups and one chloro group. It is mainly utilized as an effective protective agent of alcohols, amines, hydroxyl, and carboxyl groups in organic synthesis.
<b>Features &amp; Benefits</b>	Versatile silyl chloride. Effective protective agent of alcohols, amines, hydroxyl, and carboxyl groups.
<b>Applications</b>	Used as a silylation reagent and a protective agent in the synthesis of various organosilicon compounds and pharmaceuticals.

### Typical Properties

Description	tert-Butyldimethylchlorosilane
Product No.	ChangFu® SBA11TM
CAS No.	18162-48-6
Formula	C <sub>6</sub> H <sub>15</sub> ClSi
Purity	min 96%
Color	white
Appearance	solid

<b>Package</b>	Offered in 25L pails and 200L drums. Custom packaging is available.
<b>Storage</b>	Stored in a cool, well-ventilated place. Keep container tightly closed.
<b>Transportation</b>	See the corresponding Safety Data Sheet.
