

ChangFu® HE32
5-Hexenyltrimethoxysilane

Description	ChangFu® HE32 is an unsaturated long-chain silane monomer offering superior flexibility and reactivity. Its unique structure makes it a versatile compound as coupling agent & crosslinker.
Features & Benefits	Able to improve wettability and dispersion of fillers and pigments. Greater flexibility compared to conventional silanes.
Applications	Used as a coupling agent, a crosslinker, and a filler modifier in coatings and adhesives. Used as a crosslinker for the synthesis of silicone rubber and silicone resin. Used as a surface modifier for inorganic pigments and fillers.

Typical Properties

Product No.	ChangFu® HE32
Description	5-Hexenyltrimethoxysilane
CAS No.	58751-56-7
Formula	C ₉ H ₂₀ O ₃ Si
Purity	min 95%
Color	Colorless or light yellow
Appearance	Clear liquid

Package	Offered in 25L pails and 200L drums. Custom packaging is available.
Storage	Stored in a cool, well-ventilated place. Keep container tightly closed.
Transportation	See the corresponding Safety Data Sheet.
