

ChangFu® CL34

3-Chloropropyltris(trimethylsilyloxy)silane

Description	ChangFu® CL34 is one of the typical MT siloxane oligomers that are obtained through hydrolytic condensation of monofunctional silane(M) and trifunctional silane(T). It has high reactivity, high refractive index, and low surface energy.
Features & Benefits	High-reactive silicon compound. Containing chloropropyl functional group. Low surface energy.
Applications	Used as a crosslinking agent in the preparation of addition liquid silicone rubber, modified silicone oils and resins. Used as a reagent and a laboratory chemical in the synthesis of chemical compounds.

Typical Properties

Description	3-Chloropropyltris(trimethylsilyloxy)silane
Product No.	ChangFu® CL34
CAS No.	18077-31-1
Formula	C ₁₂ H ₃₃ ClO ₃ Si ₄
Purity	min 95%
Color	Colorless or light yellow
Appearance	Clear liquid

Package	Offered in 25L pails and 200L drums. Custom packaging is available.
Storage	Stored in a cool, well-ventilated place. Keep container tightly closed.
Transportation	See the corresponding Safety Data Sheet.
