

Technical Data Sheet

ChangFu® MA24

3-Methacryloyloxypropylbis(trimethylsiloxy)methylsilane

Description ChangFu® MA24 is a highly reactive methacrylate functional silane. Its exceptional reactivity activated by heat or initiators enables copolymerization with acrylic acid, methacrylic acid, vinyl acetate, styrene, and other unsaturated double-bond monomers.

Features & Benefits Improves water and oil repellency.
Able to improve crosslinking density.
Excellent copolymerization capability with various unsaturated monomers.

Applications Used as an effective modifier in silicone-based hydrogel contact lenses, improving oxygen permeability while maintaining optical transparency.
Used in the synthesis of specialty copolymers with unique solubility and thermal properties.
Used for polymer grafting and substrate surface modification.
Used for acrylate resins to reduce surface energy.

Typical Properties

Description	3-Methacryloyloxypropylbis(trimethylsiloxy)methylsilane
Product No.	ChangFu® MA24
CAS No.	19309-90-1
Formula	C ₁₄ H ₃₂ O ₄ Si ₃
Purity	min 96%
Color	Colorless or light yellow
Appearance	Clear liquid

Package Offered in 25L pails and 200L drums.
Custom packaging is available.

Storage Stored in a cool, well-ventilated place.
Keep container tightly closed.

Transportation See the corresponding Safety Data Sheet.
